A personal digital tool for everyone.

The MANHATTAN® Digital Pen Tablet is an ideal complement to newer computers equipped with Microsoft Vista and Microsoft Office. It's built to support digital ink, handwriting recognition and document annotation capabilities giving users a new level of interaction with their computers. The MANAHATTAN Digital Pen Tablet supports Adobe PhotoShop, Illustrator and Flash, Corel Painter, Autodesk Maya and 3D Studio Max, Pro/E and other popular software applications (full and trial versions of popular software applications are included). Ideally suited for home and office, its versatility can help a wide range of new users find innovative ways to help maximize creativity and productivity.

The Right Size and Set of Features

The lightweight RF wireless pen with 512 pressure sensitivity levels and 15° tilt enable the creation and edit of photos, drawings and other digital documents in a way that's more natural and instinctive. Its three programmable buttons are easily customized to suit user preferences with automatic power-save to reduce battery drain keeping it ready for use. An integrated menu strip contains 16 built-in hotkeys for on-tablet control of frequent menu commands and application functions. Two programmable keys can be set to perform keystroke combinations or launch a menu item without using the mouse and interrupting workflow. A low profile and generous cable combine to provide natural, relaxed working positions. The compact size makes it a good addition and fit with most stationary and mobile workspaces.

It's Not Only for Artists

More precise and intuitive than a traditional keyboard and mouse combination, every point on the tablet has a corresponding location on the screen. Cursor positions are matched with pen movements to help support handwriting recognition for note-taking, email and meeting minutes, signatures, signature capture and authentication and pen navigation.

Easy and Quick Installation

Compatible with Windows and Macintosh systems, the MANHATTAN Digital Pen Tablet includes driver CD and a USB connection for quick setup without the need for an external power supply.
